these four volumes with close to one thousand contributions are the proceedings from the viiith international congress on photosynthesis which was held in stockholm sweden on august 6 11 1989 the site for the congress was the campus of the university of stockholm this in itself was an experiment since the campus never before had been used for a conference of that size on the whole it was a very sucessful experiment the outcome of a congress depends on many contributing factors one major such factor being the scientific vigour of the participants and i think it is safe to say that the pariticipants were vigourous indeed many exciting new fmdings were presented and thoroughly dicussed indoors in the discussion sessions as well as outdoors on the lawns for the local organizing committee it was

very rewarding to participate in these activities and to watch some of our younger colleagues for the first time being subjected to the impact of a large international congress the stimulating effect of this event on the local research atmosphere has been substantial as was the case with the proceedings from both the 1983 and 1986 congresses these proceedings have been compiled from camera ready manuscripts and the editing has mainly consisted of finding the proper place for each contribution and distributing the manuscripts into four volumes with some internal logic in each in this i have had the invaluable help from dr

with the increasing focus on science education growing attention is being paid to how science is taught educators in science and science related disciplines are recognizing that distance delivery opens up new opportunities for delivering information providing interactivity collaborative opportunities and feedback as well as for increasing access for students this book presents the guidance of expert science educators from the us and from around the globe they describe key concepts delivery modes and emerging technologies and offer models of practice the book places particular emphasis on experimentation lab and field work as they are fundamentally part of the education in most scientific disciplines chapters include discipline methodology and teaching strategies in the specific areas of physics biology chemistry and earth sciences an overview of the important and appropriate learning technologies icts for each major science best practices for establishing and maintaining a successful course online insights and tips for handling practical components like laboratories and field work coverage of breaking topics including moocs learning analytics open educational resources and m learning strategies for engaging your students online

the icannga series of conferences has been organised since 1993 and has a long history of promoting the principles and understanding of computational intelligence paradigms within the scientific community and is a reference for established workers in this area starting in innsbruck in austria 1993 then to ales in france 1995 norwich in england 1997 portoroz in slovenia 1999 prague in the czech republic 2001 and finally roanne in france 2003 the icannga series has established itself for experienced workers in the field the series has also been of value to young researchers wishing both to extend their knowledge and experience and also to meet internationally renowned experts the 2005 conference the seventh in the icannga series will take place at the university of coimbra in portugal drawing on the experience of previous events and following the same general model combining technical sessions including plenary lectures by renowned scientists with tutorials
